## CONFERENCE VENUE

In 2022 the conference will be held in Wroclaw, Poland and also via MS Teams for those who can't take part in person.

## CONFERENCE TOPICS

International Academic Conference “e-methodology” is dedicated to the difficulties connected with research in social sciences and humanities conducted by means of the Internet, as well as the opportunities that it provides. We accept theoretical lectures on this subject and lectures presenting the results of research conducted on or by means of the Internet (understood as a research environment and/or a research tool). We would like the authors to pay special attention to the specificity of “Internet methodology”.

### We propose three sections:

- 1) **“About the Internet” – Theory** (Theoretical papers on the difficulties and the opportunities created by using the Internet in scientific research)
- 2) **“On the Internet” – Research** (The results of research conducted by means of the Internet)
- 3) **“With the Internet”**
  - **Projects** (Project reports and research/educational projects presenting the opportunities provided by using the Internet)
  - **Practice** (Communication with the patient/client via the Internet; problems of self-diagnosis on the Internet; use of new technologies in the medicine, in the promotion of health)

This year we are looking for papers conducted with **Application of Innovative Medical Data Science technologies (Big Data, AI)**. This section is being prepared with European Scientific Project HeartBIT\_4.0 supported by European Commission and will contain:

- 1) **AI, machine learning, Big Data in medicine and healthcare**
- 2) **Telemedicine, virtual reality and health applications.**
